Don't get caught out undercharging or overcharging your dual battery setups again with the GSL Electronics Dual Battery Monitor.

## Key features include:

- Accurate to  $\pm 50\text{mV}$ , this dash mounted monitor will not leave you in the dark about your charging states again.
- Visual indications of Low Battery charge when lower than 11.00V and Over Voltage over 15.00V.
- Auto dimming display for low light conditions with out the need for a extra wire to the vehicle.
- Measurements displayed both in 0.01V increments as well as a bar graph.
- Can be used in both Dual Battery mode or Single Battery mode.
- Supplied with easy attached velcro (so no drilling required!)

## Technical Specifications:
